MANAGEMENT DISCUSSION AND ANALYSIS REPORT

a. Industry structure and developments

Your company falls under the segment of SEBI registered capital market intermediaries. The capital market regulator discharges its function of Regulation through the process of registering the intermediaries conducting various businesses as defined. Every capital market intermediary can function within the framework of rules & regulations of the regulator prescribed for each functional activity. SEBI registers the market participants such as Stock Exchanges, Brokers, Merchant Bankers, Foreign Portfolio Investors, Depositories, Depository Participants, Bankers to the issue, Underwriters, Venture Capital Funds and so on. Your company is a SEBI registered Category I Merchant Banker since December 1993. As on 31st March, 2015 there are 197 Merchant Bankers registered with SEBI. Your subsidiary Keynote Capitals Limited (KCL) is registered as 'Corporate Broker' under cash and equity derivative segment. There are 3757 Corporate Brokers registered with SEBI and 2990 Brokers under equity derivative market segment as on 31st March, 2015. The subsidiary is also Depository Participant (DP) of CDSL. As on 31st March, 2015 there are 854 entities registered with SEBI as DPs of NSDL & CDSL. The industry structure is well organized as the intermediaries are required to function within the framework of regulations made by SEBI & Stock Exchanges. Over the period industry has seen various developments and has become more and more regulations driven. All the corporate entities particularly in listed segment are bound by various disclosures and other requirements of SEBI and the roles of intermediaries has turned out to be of the specialized character. Recently SEBI has commenced issuing permanent registrations to Merchant Banks who fulfill eligibility criterias. Your company has also received Permanent Registration as Merchant Banker on 8th June, 2012. SEBI has also initiated process of education to the capital market intermediaries through National Institute of Securities Market (NISM) by making it compulsory for the officials/executives of intermediaries to undergo examination and/or process of Continuing Professional Education (CPE). SEBI & other regulators act swiftly to align its policies in tune with global market conditions/practices.

b. Opportunities and Threats

With the vibrant economic conditions and capital market conditions there are many opportunities for Merchant Bankers and other intermediaries to provide services to the clients. The capital raising is a specialized job on account of various applicable regulations which gives better opportunities for well structured organizations with good base of experienced & highly educated employees. However, the industry is marred with large size of transactions making it difficult for many small and medium enterprises to raise equity resources easily. The size of operations of mid market Merchant Bankers can pose a threat as they may become irrelevant unless specialized skills are acquired and practiced.

c. Segment-wise performance

Your company derives income mainly from advisory services in the field of Merchant Banking, Corporate & ESOP Advisory. On a consolidated basis company also derives income from broking and related activities, trading in securities and financing activities. Your company reported an income of ₹.408.67 lacs for the year ended 31st March, 2015 which is fallen by 46.75% over last financial year income of ₹.767.42 lacs. Similarly the income on consolidated basis has fallen to ₹ 1,317 lacs from income of ₹. 1,842 lacs in the last financial year registering a drop of 28.50%. This is mainly attributable to the volatile market conditions resulting in fall in resource raising activities on an overall basis. The competition in the stock broking activities have also become intense resulting in drop in brokerage and other income.

d. Outlook

The outlook for the current financial year looks optimistic on account of political stability at the centre with expectation of well defined process of decision making at government & other levels. However, the Indian markets are bound to react to the international events. The uncertainty as regards crisis in Greece, Chinese economy and other factors are likely to play very important role as far as Indian capital market is concerned.

e. Risks & Concerns

Industry is always facing the risk of adverse effects on business on account of external factors. The capability of execution and completion of mandates remains a challenge on account of various factors. Though there

are many registered Merchant Bankers, the number of entities which are active in the said segment is very less. The institutionalization of the Merchant Banking business by the large players remains a concern for many mid market participants to cope up with fast growing and changing landscape in the financial market.

f. Internal Control

The company being in existence as Merchant Banker since past 2 decade has developed well structured internal control systems to conduct the business within the framework of Regulations. The present structure & systems are adequate and commensurate to the size of operations of your company.

g. Discussion on financial performance with respect to operational performance

The financial year 2014-15 saw major change in political scenario in the country. The new government with a majority assumed charge at the centre. The expectations of markets including financial markets increased due to stable government with a general sense of optimism & enthusiasm. Though the capital market showed signs of improvement, the primary market conditions did not improve drastically. However, few IPOs were launched in the capital market and resource raising in the form of equity through capital market issuances have improved. Your company also has been able to get a few mandates for IPOs, Rights Issues & other Advisory services in respect of preferential allotment, private equity placement etc. During financial year, your company filed the draft offer documents in respect of 2 Public issues and 3 Rights issues besides handling other assignments. However, many of the transactions could not be completed due to adverse primary market conditions which has resulted in sharp fall in income from operations. Company was able to complete certain assignments in 'Corporate Finance' area such as advising companies on raising debt from Banks, corporate advisory services, valuation services etc. Company continued to provide advisory services in respect of ESOP transactions. There has been a strain on profitability. During the financial year, company could post total income of ₹ 583.68 lacs with a profit after tax of ₹ 52.09 lacs as against income of ₹ 942.12 lacs and profit after tax of ₹ 206.53 lacs for the previous financial year 31st March, 2014. The company has to maintain the team of professionals which is essential to cope up with future possibilities of improvement in business environment. Company is hopeful of overall improvement in the capital market and would be able to post reasonable good income levels in years to come.

h. Material developments in Human Resources/Industrial Relations front, including number of people employed

You company operates with a sleek employee structure. The employee strength of the company and its subsidiaries is about 47. The company has already put in place adequate processes, facilities, infrastructure and environment enabling the employees to function in an appropriate manner. The company has adequate compensation structure at each level of employee resulting in appropriate relationship. There are no significant developments in this regard during last financial year except a few resignations and appointments which are routine in nature.

2.1 Summary of significant accounting policies

a. Use of estimates

The preparation of financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues and expenses during the reporting period and reported amount of assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

b. Tangible fixed assets and Capital Work-in-Progress

Fixed assets are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

b. Use of estimates

The preparation of consolidated financial statements in conformity with Indian GAAP requires the management to make judgments, estimates and assumptions that affect the reported amounts of revenues and expenses during the reporting period and reported amount of assets and liabilities and the disclosure of contingent liabilities, at the end of the reporting period. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these assumptions and estimates could result in the outcomes requiring a material adjustment to the carrying amounts of assets or liabilities in future periods.

c. Tangible fixed assets and Capital Work-in-Progress

Fixed assets are stated at cost, net of accumulated depreciation and impairment losses, if any. The cost of Fixed Assets comprises of purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use.

Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its

previously assessed standard of performance. All other expenses on existing fixed assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

The advances given for acquiring for Fixed Assets are shown under Loans and advances (Capital advance).

d. Depreciation on tangible fixed assets

Depreciation on fixed assets is calculated on a straight-line basis as per the useful life of the assets including property held as Investment as prescribed under the Schedule II of the Companies Act, 2013, Except for the following assets where the management has estimated useful life which differs from the useful life of 60 Years prescribed under the Act.

Assets	Balance useful life (Years) From the date of acquisition (date of construction not available)
Investment Property	60 years

For this asset, based on assessment of technical expert, the management believes that the useful lives as given above best represents the period over which management expects to use this asset. Hence, useful lives for this assets are different from the useful lives as prescribed under schedule II of Companies Act 2013.

e. Intangible assets

- i) Expenses incurred on Computer Software having enduring benefits are capitalized and amortized on Straight Line Method (SLM) basis over a period of five years.

Assets subject to operating leases are included in fixed asset/Investment property. Lease income on an operating lease is recognized in the statement of profit and loss as per the terms of lease arrangements.

g. Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized as part of the cost of the respective asset. All other borrowing costs are expensed in the period they occur.

h. Impairment of tangible and intangible assets

Assets are reviewed for impairment at each balance sheet date. In case, events and circumstances indicate any impairment, the recoverable amount of these assets is determined. An asset is impaired when the carrying amount of the asset exceeds its recoverable amount. An impairment loss is charged to the statement of profit and loss in the period in which an asset is defined as impaired. An impairment loss recognized in prior accounting periods is reversed if there has been a change in the estimates of the recoverable amount and such loss either no longer exists or has decreased.

i. Investments

Investments, which are readily realizable and intended to be held for not more than one year from the date on which such investments are made, are classified as current investments. All other investments are classified as Long-term Investment.

On initial recognition, all investments are measured at cost. The cost comprises purchase price and directly attributable acquisition charges such as brokerage, fees and duties. If an investment is acquired, or partly acquired, by the issue of shares or other securities, the acquisition cost is the fair value of the securities issued. If an investment is acquired in exchange for another asset, the acquisition is determined by reference to the fair value of the asset given up or by reference to the fair value of the investment acquired, whichever is more clearly evident.

Current investments are carried in the consolidated financial statements at lower of cost and fair value determined on Individual investment basis. Non-current investments are carried at cost. However, provision for diminution in value is made to recognize a decline other than temporary in the value of the investments.
